PATENT EXAMINER

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/7/05 has been entered.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Q. Vidas on 1/13/06

The application has been amended as follows:

**SPECIFICATION**

Page 4, line 8, after 'dioxide', insert --, in terms of volume,--.

Page 4, line 9, after 'dioxide', insert --, in terms of volume,--.

The following is an examiner's statement of reasons for allowance:

After further review of the claimed invention and prior art of record, the claimed invention is novel over the prior art of record because the prior art of record fails to appreciate the claimed invention with respect to the claimed composition based on the claimed primary particle size coupled together with the claimed specific  $D_{95}/D_5$  and  $D_{95}/D_5/D_{SA}$  ratios. The prior

art of record is silent as to the claimed specific ratios, thus these aspects are not appreciated by the art when coupled with the claimed composition, as a whole. The new reference cited on the 892 (Vogt et al. (766)) does not teach the size of the primary particles. In addition, although this reference teaches weight percents of the silica sizes, the volume of said sizes can not be directly translatable to volume, the volume ratio of the instant claims is not appreciated. The above reasons for allowance are independent of applicants remarks because said remarks are based on the criticality shown in the tables, however, the results defined in the tables relied upon for showing criticality are fully not commensurate in scope with the claims. The examiner acknowledges the declarations filed 12/7/05, however, these declarations are not fully used in the basis for patentability because said declaration refer to the criticality of the claimed ratio and as defined above, any evidence submitted is not fully commensurate in scope with the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Marcheschi whose telephone number is (571) 272-1374. The examiner can normally be reached on M-F (8:00-5:30) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on (571) 272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
